Work Experience

Web Developer @ iKnow Academic Hub
Jan 2025 - Aug 2025

- Built a full-stack web application from scratch using React.js for the frontend, Node.js for the backend, and MySQL for database management.
- Designed and implemented RESTful APIs to support core application features and data flow.
- Developed a custom WordPress theme from the ground up, translating design requirements into a fully responsive and user-friendly website.
- Collaborated closely with founders to define requirements, system architecture, and product features for an early-stage startup.

Front-End Developer @ Dotty Solutions Inc.
Sep 2023 - Nov 2024

- Builds web applications using Vue JS and React JS
- Built and customized a Shopify store including theme customization and basic app configuration.
- Managed, maintained, and updated multiple WordPress websites, ensuring security, performance optimization, and content accuracy.
- Performed ongoing website updates, bug fixes, and enhancements to improve usability and stability.
- Created responsive web pages and cross-client compatible email templates

Web Developer Intern @ Pixel8 Web Solutions & Consultancy Inc.
Feb - May 2022

- Developed and implemented front-end functionalities within a management system, collaborating with other developers and QA personnel to ensure quality code and an optimal user experience for the features.
- Utilized Vue.js, Quasar Framework, and SASS to translate interactive Adobe XD UI designs into fully functional features.
- Consistently accomplished all task tickets within designated timelines, resulting in fewer failed tasks and accelerating the development process.

Projects

Hirestats - Job Application Tracker

- Built my own full-stack SaaS web application to help job seekers track applications, interviews, and progress in real time.
- Designed a session-based tracking system with free and paid usage limits.

iKnow Academic Hub

- Educational website designed to promote and manage online academic review programs. The platform functions as a comprehensive learning and review center, helping students prepare for college entrance exams and strengthen academic mastery.

HRC - Ecommerce Store

- Features such as email notification, order verification using OTP, order tracking, and shopping cart system.
- Developed REST API backend using Node.JS, Express, and MongoDB.
- Used frontend technologies such as React, Redux Toolkit, TailwindCSS and MantineUI.

Skills

Programming Languages

Javascript, TypeScript, HTML, CSS/Scss, PHP

Database/Tools: SQL (MySQL), NoSQL (MongoDB)

Libraries & Frameworks

React, Redux Toolkit, RTK Query, Express.Js, Vue.Js, Styled Components, Quasar Framework, Tailwind CSS, Mantine UI, Material UI, Wordpress, GSAP Animation

Tech Stack: MongoDB, Express.Js, React, Node.Js, Laravel, Livewire

Tools & Platform

Postman, BurpSuite, Git, Github

Soft Skills

Problem Solving, Time Management, Adaptability, Self Learning, Teamwork

Others

Linux OS, Archlinux

Education

Bicol University Polangui Campus

2018 - 2022

Bachelor of Science in Information Systems

Certification

API Penetration Testing

2025

Site: APIsec University

Software Developer

2022

Company: Pixel8 Web Solutions & Consultancy Inc

Best Thesis Award

2022

Project: Student Profiling System

Interests

Exploring modern web technologies, learning web security best practices, building SaaS applications
